

YOUTH LOCKER JUNIOR

makes the juniors feel grown-up

This junior locker has been designed and equipped to the needs of youth fire brigades. The helmet compartment and clothes rail are at the children's eye level. Reinforced material thickness and hard-wearing metal hooks ensure a long-lasting, low-wear construction. The storage shelf can optionally be equipped with a valuables compartment door. After removing the helmet, valuables can be stored safely.

Body:

- torsion-resistant, made of sheet steel
- aluminium clothes rail made of oval profile with three non-twisting metal hooks
- smooth, easy-clean surfaces

Valuables compartment door (optional):

- fixed by sturdy stainless steel bolts
- opening angle ca. 110 degrees
- rubber pads to reduce noise

Variants:

- for 1, 2 or 3 persons
- shelf or lockable valuables compartment
- helmet holder on the top
- feet, plinth or wall assembly
- zinc-plating

160 x 90 x 50

Rugged metal hooks and clothes rail

The aluminium clothes rail with non-twisting metal hooks reliably carries heavy equipment and ensures easy removal. The increased material thickness makes the entire locker extremely robust.

Sloping roof (optional)

Sloping roofs prevent the storage of items on the cabinets. Thus nothing remains and dirt deposits are prevented.

Locks

As standard, the gear lockers are equipped with a cylinder lock or latch lock. Further locks can be installed on request.

Paintwork

The high-quality powder coating of body and doors is available in almost all RAL colours. Light grey, Flame red and Gentian blue are included in the price.

You can find further information about our range of high-quality steel furniture on our website. We would be pleased to send you our catalogue and advise you on site or on the phone.
