

Permanent magnet assemblies for magnetic flaw detection

AMT&C LLC produces a wide variety of magnetic blocks – basic components of the pipeline flaw detectors. Thanks to the stable quality and guaranteed high magnetic parameters of our magnetic assemblies we supply them for largest Russian companies - producers of the diagnostics equipment for gas and oil pipelines.

Permanent magnet assemblies for magnetic flaw detection 24MT.

Permanent magnet assemblies for magnetic flaw detection 32MTK-00-01-070.
