

HOT-MELT GLUE LABELLING MACHINE

DESCRIPTION

Hot melt glue labeling machine is widely used for different material of container . The label cost is comparatively lower, it can meet the requirements of users who have diverse kinds of the containers.

It is the most economical models in cost to make mass production and intergrated operating. The equipment has massively used modularization design concept to make it easy and simple for users to change the bottles.

Whether from the replacement of star wheel, guide plate or manual speed adjustment to automatic speed control, for example changing the label is only needed to change the program, the products concept of that the equipment is designed for users is embodied in everywhere.

Process: In feed bottle → pre-position → label cutting → gluing → labeling → label by press out → finish

SPECIFICATION

Labeling speed	6000-12000 bottles/hours(600ml)
Bottle type	cylindrical bottles
Bottle Material	PET, glass, metal.
Bottle height	25-360(mm) (according to the specifications)
Label Height	15-150(mm)
Bottle-necks range	φ40-φ128mm (according to the specifications)
Label Material	OPP, BOPP, composite membrane, paper
Paper Tube diameter	6 inches (152 mm).
Compressed Air	8 Kg/cm2 (clients shall independently equip with the air compressors with the power of over 3 HP)
Consumption power	6Kw
Voltage	AC 3φ, 380V/60HZ.
Mechanical dimensions	2600L*1150W*1800H(mm)
Weight	1500Kg
