

BeneSOL 0-25-0

Organic Fertilizer

BeneSOL 0-25-0 is a natural product of mineral origin subjected to an innovative physical process, without chemical alterations and an organic compatibility certification for application in organic production programs.

The processing of the fertilizer increases the surface area and dispersibility, allowing it to be injected under agitation in all the different irrigation, fumigation and spray boom systems available on the market. Since it is categorized as dispersible powder it has a high agronomic effectiveness and reactivity.

This product provides a high level of calcium and silicon, which is fundamental for the productivity and induction of the plant's immune system and which improves the condition of the fruit and its post-harvest viability.

This product is certified for use in organic agriculture in compliance with EC834/2007 and EC 889/2008.

Unique characteristics:

- Micronized rock phosphate product
- High level of calcium
- contains silicon for strong leaves
- Phosphate source that works slowly
- can be used with spraying

Product characteristics

| | |
|--------------|----------------------|
| Shape | Powder |
| Raw material | Micronized soft rock |

Nutrition values

| | | |
|--------------|---------------------------------------|--------|
| Phosphorus | (P ₂ O ₅) | 25,0% |
| Calcium | (CaO) | 37,0% |
| Silicon | (SiO ₂) | 4,0% |
| Magnesium | (MgO) | 2,0% |
| Heavy metals | Sum of As, Pb, Cr, Co, Hg, Ni, Cd, Se | <0,05% |

Application Dose

| | |
|--------------------------|---|
| Fertigation: | 1 kg/100 lts of water in the fertilizer tank and said solution injected at 1% in the irrigation system. |
| Sprayers and spray boom: | 1 kg/100 lts |
| General Recommendation: | 160 – 350 kg/ha throughout the season. |

beneficial fertilizers

Storage

BeneSOL 0-25-0 can be stored for an extended period in a well ventilated place away from moisture.

Delivery

BeneSOL 0-25-0 can be delivered as:

- Big bags from 500 to 1000 kg
- 25kg bags
