

FIN FINE®

## FINFIRE Next generation fire extinguishers.

FINFIRE "SPHERE" and FINFIRE "TAB" - self-contained powder fire extinguishing devices. Devices are designed to extinguish without human intervention fires of solid, liquid and gaseous substances, as well as electrical equipment under voltage.

- Self-contained powder fire extinguishing devices is used in warehouse, technological, household premises, garages, apartments, shops, vehicles and other places. Used as portable fire extinguishers or in addition to them. Extremely simplified design does not require special skills, and also great physical effort, helps to significantly save time, which it is very necessary in critical situations.
- The devices consist of a polystyrene body filled with fire extinguishing powder. Fire-conducting cords pass along the edges of the body. The cords will activate the device upon contact with fire. Within 10 seconds, clap (an additional warning signal about fire) is heard, the hull breaks and fire extinguishing powder is released, after which the fire source will be instantly localized.

## Benefits:

Self-contained and manual operation mode of the device

High reaction speed to the occurrence of fire and instant suppression of fire

Easy to use – no special skills required

Maintenance-free

Environmentally friendly, free of toxic substances

Noise alert, when triggered

Certified by FGBOU VO «Academy State Fire Service of the Ministry of Emergency Situations Of Russia»

Production certification  
GOST R ISO 9001-2015 (ISO 9001: 2015)  
GOST R ISO 14001-2016 (ISO 14001: 2015)  
GOST R 54934-2012 (OHSAS 18001: 2007)

Expiration date 10 years

Made in Russia

# FINFIRE "SPHERE"

## Instruction

### Automatic mode:

To place the device offline, it is necessary to install a fastener with a large diameter circle up.

1. Position the device up to 30 cm above or on the side above the high risk of fire.

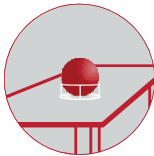

2. Attach the device with universal mount. Make sure the arrow on the housing is pointing down.

3. When in contact with a fire, the device is independently activated with warning clap instantly extinguishes the fire source.

### Manual mode:

To be placed in manual mode, the universal mount is used as a support, which is located with a large diameter of the attachment circle downward.

1. Place the device in a visible and accessible place with a universal attachment.

2. In case of fire, throw the device into the fire from a safe distance.

3. Within 10 seconds, the device will work automatically and the fire will be extinguished instantly.

# FINFIRE "TAB"

## Instruction

1. Position the device up to 30 cm above or on the side above the high risk of fire.

2. Attach the device using double-sided tape to a flat and dry surface.

3. When in contact with a fire, the device is independently activated with warning clap instantly extinguishes the fire source.
