production technology**

«Ordinary» resolution

- Communication lines are not secured.
- Sloppy appearance.
- It is difficult to find the necessary cable in the case of a network audit.

Ufanet solutions

- Protection of communication lines from damage.
- Aesthetics and durability.
- Easy operation and monitoring of network status.
- The time for installation and construction of communication lines is reduced.
- Optimal market value.

Cable tray

**The ducts is a metal
semicircular**

**Metal triangular
duct**

Cable tray Unicor

Unicor cable channel
Is used for backbone and subscriber lines.
A distinctive feature of this cable channel is the absence of a cover; cable lines are laid through a slot in the top of the box. The cable channel design provides holes for wall-mounting.

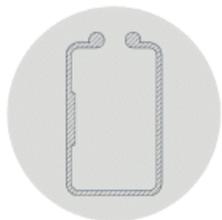

Composition:

Self-extinguishing PVC composition

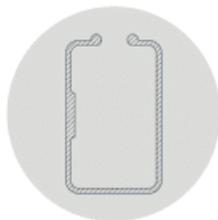

The cable tray has the Fire Safety Certificate.
