Solar hose

The solar hose made by FRÄNKISCHE INDUSTRIAL PIPES is ideal for solar water heating (from 24°C to 30°C). The hose is made of high-quality PP and is durably resistant against saltwater, chlorine, UV radiation and therefore best suited for solar service water heating. Due to pre-molded couplings, it can be split individually and even installed in already existing filter cycles.

made in Germany

APPLICATIONS

- Pool bottom cleaners
- Pool cleaning brushes
- Sand filter units
- Pumps
- Solar cycles in swimming pool equipment
- Swimming pool absorbers
- Skimmers

CUSTOMER BENEFIT

- UV-stabilized
- Highly flexible
- Hard-wearing
- Durable
- Easy to cut and to install
- Self-floating

DELIVERY FORM

Standard delivery in
50- and 100-meter coils

Colors available:
black

Individual deliveries available
on request.

MATERIALS

PP with UV stabilizer
-40°C to 105°C

Other materials on request.

DIMENSIONS

- NW 32 (individual coupling spacing)
- NW 38 (individual coupling spacing)

Other dimensions on request.
