Output signals

2-wire: 4 ... 20 mA (pressure)
2-wire: 4 ... 20 mA (temperature)

Special characteristics

- diameter 26.5 mm
- separate output signals
  for pressure and temperature ranges
- good long term stability
- easy handling
- low maintenance and wiring costs

Optional versions

- different kinds of cables
  and elastomers
- customer specific versions

The stainless steel submersible probe LMK 307T with flush mounted ceramic sensor has developed for continuous level and temperature measurement in water or waste water applications.

The advantage: simultaneous recording of level and temperature with separate independent signal amplification. The maintenance and wiring costs are considerably reduced.

In addition to classical signal processing of the level, an additional signal circuit independent of the level which converts the temperature signal into a 4 … 20 mA analogue signal in 2-wire technology is provided.

Preferred areas of use are

Water
drinking water systems
ground water monitoring
domestic water tanks
rain spillway basin

Sewage
waste water treatment, water recycling
dumpsite, waste water tanks

Fuel and oil
fuel storage, tank farm, biogas plants
