

Product description

Applying Reinasan 24/7 Active Protection adds additional functionality to hygiene-sensitive objects or surface types. This creates effective source control so that microbiology and unpleasant odours have no chance to develop. Even any stains are easily removed with the available pH-neutral maintenance agent. Heavy chemicals are dispensed with, extending the service life resulting in cost savings. The system affects not only hygiene, but also behavioural change, safety and disease spread.

Addition

Hazard-free protection and care agents have no negative effects on existing properties of fabrics or materials. This also prevents residue build-up and cross-contamination. There is a guarantee of up to 3 years on demonstrable performance and durability. This is secured with measurements on the spot. This gives you a grip on a healthy workplace that has an impact on sick leave, among other things.

Partner information

Reinasan works exclusively with partners. After a company successfully completes the training course, the trained employees are certified. This enables the partner to carry out assignments 100% independently. In this way, they can distinguish themselves by offering extra service and contribute to making our planet more sustainable and circular. Also, the system offers the partner the opportunity to generate more turnover.
