CURTAIN WALL

## DESCRIPTION

Are you looking for an original and modern facade cladding that catches the eye?

If the curtain wall is generally associated with large office or showroom buildings, this type of facade can also adapt very well to a modern style villa. You can use this technique to also create an original veranda.

With the help of a good ventilation system, you will be able to save energy during sunny winter days and remove heat during the summer. These coatings are designed taking into account thermal expansion and compression and water evacuation. Thanks to the glass, a large amount of natural light will enhance your interior.
