LOOPED SCREEN

ABOUT US

ADENWEDGEWIRE operates in Technopark Istanbul which is the biggest technology development center in Turkey. We carry out R&D activities with a highly skilled engineering team that specialized in designing and manufacturing customer-specific wedge wire products depending on the requirements.

Our wedge wire screens focus on full customer satisfaction in terms of competitive cost, short shipping time and high mechanical properties. Manufacturing consists of robotic systems that enable high precision and flexible solutions.

Manufactured with Stainless Steel 304, 304L, 304HC, 316, 316L, 316Ti, 321 or depending on your request with different kinds of application based surface treatments and coatings.

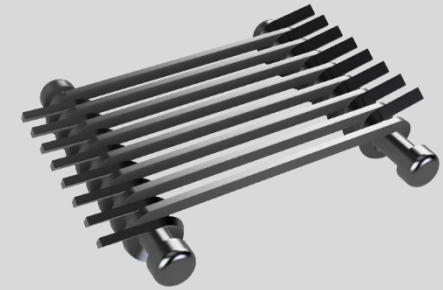

OUR CAPABILITIES

- Design & manufacturing of unique and customized Wedge Wire Screens
- Design and supply of Coanda Intake Screens
- Manufacturing of Special Bi-Cylindrical Screens for a wide range of industries
- Specific surface treatments depending on application for longer life
- Specialized tilted-wire construction to provide high filtration performance

LOOPED SCREENS

Looped wedge wire screen consists of looped meshes on the supporting bars. Looped wedge wires are used as a filter to eliminate bigger sizes or different types of materials.

We have broad and precise manufacturing capacity for the looped screens.

- ❖ Superior strength
- ❖ Long service life
- ❖ Surface Treatment based on Application
- ❖ Increased filtration performance
- ❖ Self cleaning
- ❖ No moving parts
