

Door-operated switch

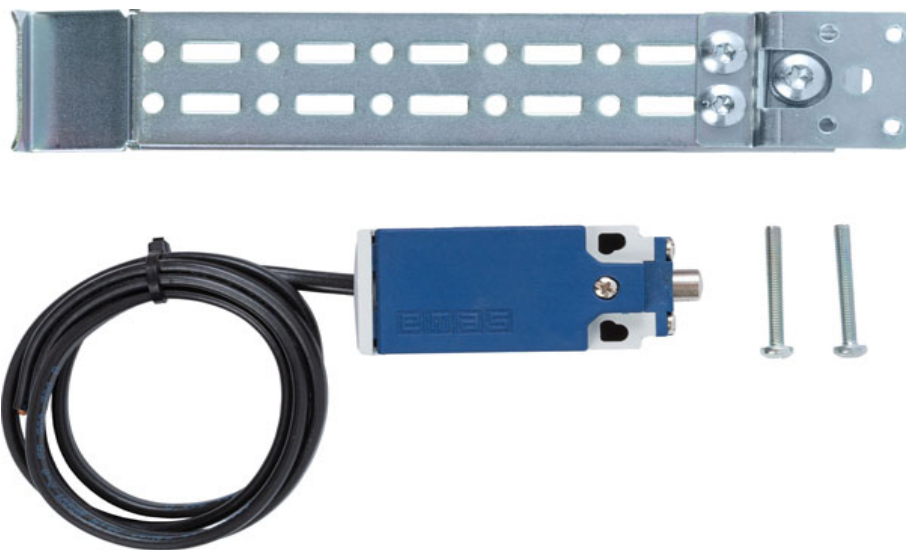

The NSBon-05 door-operated switch is designed to switch electrical circuits depending on the cabinet door position. The NSBon-05 switch has a build-in cable of 0.5-1 m. It may be installed inside the NSB-xyy series electrical enclosures using NSBon-00 mounting kit.

NSBon-05 switch is used :

- to manage lighting inside the cabinet when NSBon-06 lighting kit is used;
- to control the position of the cabinet door and to manage the alarm in case of unauthorized opening this door.

Technical Data

Design	: with connecting cable
Rated operating voltage	: 400 V
Installation options	: together with NSBon-00
For rated current (max.)	: 240 VAC, 6 A
Rated impulse withstand voltage, phase to phase	: 6000 VAC
Packs of	: 1 pc
Weight/pack	: 0.8 kg
