

## Documented process monitoring

RivSmart is equipped with the **DMSD-lite process monitoring system** even in the standard version. Serious errors can already be detected here and the number of set fasteners counted. Documentation takes the form of a process stamp containing information such as tool number, time stamp, number, error codes, and various stroke and force measurements in text format in separate process windows. Integration of the latest **DMSD 2G** process monitoring system with PLC interface directly into your corporate network is also possible as an option.

## RivSmart can do more.

### Intelligent controller

In addition to its outstanding riveting properties, the RivSmart eBZ ZERO S is prepared for integration into an increasingly networked production environment

- Mobile control via Android or IOS app
- Service functions: Information on clamping jaw change, service intervals, emptying of stud collector, job counter, live statistics
- Many basic functions: Countdown, various counters, statistics, signal tones

App-controlled  
WiFi-connected

- OLED display (1.5") with 5 buttons
- Management of several devices
- Wifi connectivity with radio frequencies 2.4 and 5 GHz
- Individual interface programming possible

Included in the scope of supply:  
SD card as **internal memory** for reading out the documented data of the process stamp, even without permanent WiFi connection.

### Rivsmart DMSD2G

**Detailed information** on the possibilities offered by **automation technology** and **process monitoring** can be found in the relevant separate documents or on our website, [www.honsel.de](http://www.honsel.de).

### Rivsmart PLConnect

Link your RivSmart to your production environment and thus combine the possibilities of your PLC with the intelligence and connectivity of RivSmart. Based on industry standards, the system is highly flexible and modular.
