

UNIKA ADJUSTABLE PEDESTAL:
The story of an ALL-IN-ONE

What makes our new UNIKA adjustable pedestal so special?

Products made in France guaranteed quality and reliability

YEED is proud to be a French company and to offer you products manufactured in our French factory, a pledge of quality and reliability.

Our commitment to produce in France ensures that every pedestal or accessory complies with current construction standards DTU 43.1 and 51.4 standards, and come with a 10-year warranty, for exceptional performance with every use!

No more storage problems or extra costs

With the UNIKA range, organize storage is a breeze.

We've considerably optimized the size of the range, including only 2 pedestals of different heights (wood or slab head option, 3 extensions and a tightening key)

This means a consequent gain in space to optimize your warehouse and make handling easier.

An ALL-IN-ONE solution

Focus on simplification to achieve more efficiently all projects

UNIKA Pedestal, sets itself apart from other products on the market by combining all essential functionalities in a single element.

No need for additional accessories to adapt to your needs, from the simplest project to the most complex, it's all integrated directly into the pedestal;

The pedestal head is self-levelling or fixed thanks to the red clamping ring, the noise-buffer wedge is directly integrated into the head (in the slab version), and the height can be adjusted either from above from the top thanks to the YEED tightening key, or manually from the side with the help of the adjustment ring.

UNIKA RANGE:
A complete and eco-responsible range

Recycled products:

At YEED Group, the comitment against global warming is a subject to which we pay the greatest attention. That's why all our products are made with regenerated polypropylene from the recycling of everyday household waste: yoghurt pots, caps, packaging... allowing us to participate in a circular economy, a model in which resources are used and recovered rather than simply thrown away.

Recyclable products:

Once the waste has been collected, it is sorted, crushed and shaped into small polypropylene balls. They are then re-extruded to create a recycled plastic ready for reuse in manufacturing and thus allows the creation of YEED Pedestals.

20, 60 or 120mm extension

Tightening key

40/60mm pedestal

30/40mm pedestal

The essential solution for your projects: between versatility and adaptability

UNIKA range is designed to meet all your needs. Whether you are building a terrace, a courtyard, a patio, a pedestrian area, a rooftop or even a pool, it adapts perfectly to all surfaces and all projects!

We guarantee exceptional durability over time. All products are made from high quality materials, which are recycled and recyclable.

They are resistant to temperature variations, frost and UV and 1 pedestal can bear more than 1 ton. Thanks to its unique features and innovative design, the UNIKA range allows you to simplify each construction step while integrating perfectly into the universe of your project.

Easy adjustment A double innovation

UNIKA pedestal stands out for its simplicity of use and practicality that will both facilitate terrace construction sites but also save considerable time for installation.

The adjustment system has been redesigned to a double adjustment system from the top with the YEED tightening key, or on the side manually by turning the adjustment ring.

Another innovation, a screw locking system allows the adjustment ring to remain clipped on the base plate or extension.

A unique range Carefully designed products at the cutting edge of technology

UNIKA is the perfect solution to all exterior leveled floorings projects.

To sum-up, UNIKA is an answer to; storage optimization, all-in-one solution, versatility, simplicity of use and guaranteed quality.

All sizes combined with only 2 pedestals

The complete UNIKA range is reduced (wood/composite and pavers) to only 2 pedestals and 4 accessories.

With this major innovation, the margin of error on the construction site is significantly reduced and adaptability to specification is maximized. The smart design of the UNIKA 40/60 mm pedestal allows to add 3 sizes of extensions to reach the ideal height needed, up to 1 meter by clipping them.

A simple, practical and unique solution, which will save time and energy, while offering unparalleled flexibility.

Opting for UNIKA means choosing the simplest and most effective method.

Highlight on our new creation: UNIKA adjustable pedestal

UNIQUE ON THE MARKET

a self-leveling or fixed head:

thanks to the red clamping ring, the head of the pedestal becomes self-leveling or fixed with a slope compensation of up to 5%.

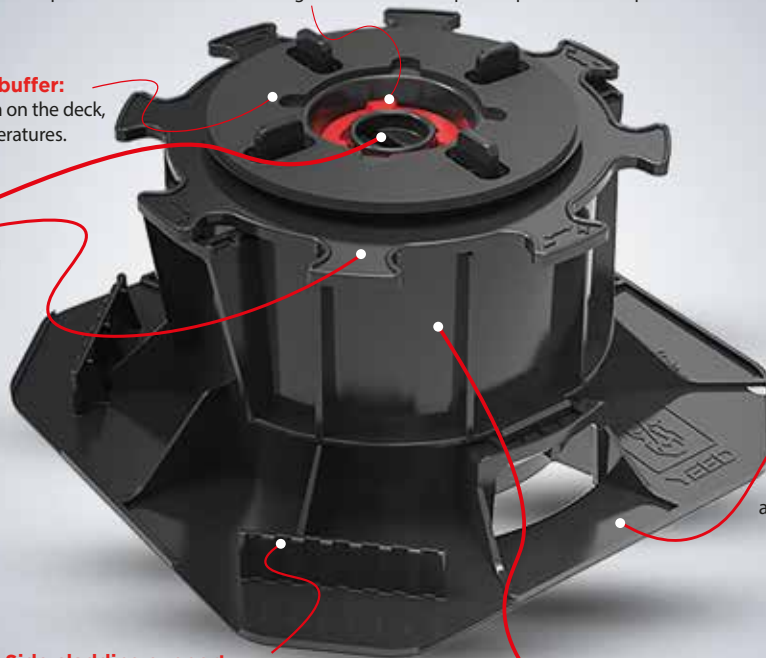

Integrated noise buffer:

reduces noise and vibration on the deck, resistant to high temperatures.

UNIQUE ON THE MARKET

Adjustment ring:

adjusts the height of the pedestal according to the needs of the project; on the side or on the top, thanks to the YEED tightening key.

Pre-cut square base:

a stable and uniform base that adapts perfectly to corners. Perforations provided to facilitate the evacuation of water.

Side cladding support:

side panelling to glue or screw for a perfect finish of the terrace.

Clip-on extension 20, 60 or 120 mm:

increases the height of the 40-60mm pedestal, up to 1 meter.

Double lugs:

the head of the pedestal can accommodate any size of joist up to 74 mm, in wood, composite or aluminum.
